

Finder Relays, Inc.

October 2006 – Product Updates

NEW - FINDER's popular 38 Series Interface Modules now available in 14mm wide 8Amp DPDT contact configuration.

FINDER's NEW 38.52 & 38.62 are designed to match and fit alongside the 6mm wide single pole versions. These new Modules are available in a DPDT 8A contact configuration with various DC & AC/DC input voltages. This neatly packaged unit has an integrated LED-Indicator, coil suppression circuit and a built in relay retaining / release clip. Wire termination choices include [screw terminals](#) or [spring clamp terminals](#). The 38.X2 version also has the benefit of an 8-way jumper link providing easy connection between common terminals, reducing installation time. Intended for panel builders, system integrators and OEMs – Finder's 38 Series are UL listed devices (File# E81856) and competitively priced to address today's and future industry switching needs.
